1) Planning

Overview: Test the functionality of the game.

Test Criteria:

- All the buttons are working.
- Wins and Losses times are accurate.
- All five robots are listed.
- All the robots have names.
- Allow players to pick two robots.
- After each fight, the scores will be shown.

2) Testing

Test Case 1: Check the 'All Bots' buttons is working.

- Navigate to http://localhost:3001/
- Click on the All Bots button to see if all bots will show up.

Test Case 2: Check if the number of wins/losses are accurate.

- Navigate to http://localhost:3001/
- Click to choose robots, after that pick two robots.
- Click the Duel buttons.
- Wait for the duels results.
- Check the numbers of Wins and Losses if it is correct or not.

3) Bug Reports

- *The Wins and Losses times are not correct Bug Report*
  Description: The total number of wins is not correct. It does not matter if the player wins or loses, their total number of losses will increase.
  Step to Reproduce:
  1. Navigate to http://localhost:3001/
  2. Click to Draw button
  3. Click to add two robots.
  4. Click Duel button
  5. Keep playing to get both lose and win

  Expected result: The total numbers of lose and win should be accurate
  Actual result: Only the numbers of losses is added up

  Wins: 0

  Losses: 10

  You won!

  Play again!
